Lighting & Living

new collection
sustainability 2024

Tangla strategy going forward.

At Tangla Lighting and Living Limited, our strategy is to be ahead of the game. We believe it's critical to gain experience and have a long term strategy when it comes to sustainability. We want to be prepared when the big green wave comes as it requires a whole new way of thinking, sourcing, developing, production and selling products.

For a circular business model, it's necessary to be able to recycle your end-of-life products into new products of equivalent quality. Using recycled fabrics for our sustainable lampshades for example, doesn't mean we already have a circular business model.

Recycling is the process of converting waste into reusable material. In our case, this means converting used PET bottles, clothing and all sorts of production waste, into recycled fabrics for our lampshades. However, the circular economy goes right back to the beginning, preventing waste (and pollution) in the first place.

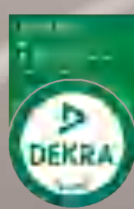

For this to happen in our industry we have a long way to go. Using recycled products is a very important first step on the circularity ladder as this will contribute to the goal of decreasing our ecological footprint (60% decrease by 2030). Beside this, it stimulates all sorts of new technical developments by increasing the value of recycled products, thereby decreasing the amount of down cycling.

At Tangla Lighting and Living Limited, we started several related projects. Our main course of business is done by product development and creating new designs. By choosing recycled or natural materials, we significantly improve our ecological footprint. We are also looking for ways to develop products which are relatively easy to recycle, and we try to reduce our waste management. Step by step we learn, and we are truly inspired by all the new partners we met during this journey. Want to join us in our journey? Get in touch with us. We love to create new sustainable lighting.
